

Technical Writer

C-RAD is an expanding global medical device company with headquarter in central Uppsala, Sweden. We develop, produce, and sell innovative solutions to healthcare customers. The focus is on patient positioning, monitoring, and imaging within radiation therapy. We are a market leader in the field of optical patient positioning.

Our products enable precision health through positioning and monitoring of patients in radiation therapy, which maximize the dose in tumours and minimize the dose in surrounding tissues.

Join us in our fight against cancer.

About the opportunity

We now have an exciting opportunity for a Technical Writer to join our Research and Development team based in Uppsala!

The task of the team is to develop and integrate world class systems to our patient positioning and monitoring products for radio therapy.

Do you have an interest in technology and want to work for a company improving the healthcare within radiation therapy? Additionally, do you have an interest, in writing? Then, this is the opportunity for you to combine these interests in the position of technical writer.

As a Technical Writer you will be a part of our Research and Development team. In cooperation with the team and other functions within the organization, your main task will be to create and update user manuals and technical documentations to be used by our installation engineers and the hospital personnel.

In the position you will receive a deep knowledge of our products and the clinical workflows.

About you

- Relevant education, likely at the university level with a technical focus.
- The ability to understand and communicate advanced technology.
- Ability to communicate clearly both verbally and in writing and easily adapt what you write depending on the audience.
- Fluent in English and Swedish (both verbally and in writing)
- Good proficiency in Word.
- Team player with excellent interpersonal and communication skills
- A valid work permit for Sweden.

Desired skills and experience

It is preferable if you also have:

- Experience of writing structured technical information
- Experience of Simplified Technical English (STE)

- Excellent planning and organizational skills

What we offer

Key position in an innovative, expanding company with a great team spirit.

Short decision-making processes supporting an efficient working environment.

Attractive possibilities for self-development and career progression.

Every day at C-RAD, we're working to help both the patient and the care provider, creating solutions that make radiation therapy treatments safer and effective, while facilitating a more efficient workflow. If you're interested in making a difference and working with a dynamic global team, we'd love to hear from you.

Please note candidate screening and interviews may be conducted prior to the closing date of the job advert.

Looking forward connecting with you!
